April 20, 2001

Dr. Kennedy Okere MD  
Horizon Inter. Medical Mission Inc.  
38 Clark Terrace  
Savannah, GA 31404

Dear Dr. Okere,

## REPORT OF TUBERCULOSIS OUTBREAK

I wish to thank God for your quick response on my request on behalf of my people concerning tuberculosis outbreak.

I received the isoniazide and Vitamin B6 for prophylaxis. We used the money you sent to buy the PPD, Syringes, cotton and other necessary items for the program.

On the 12th April, we left Ibadan for the village Umuara, Umuoye Imerienwe, and Imo State. The Doctor and Nurses carried out the treatment.

On 13th April, we carried out the test on 78 patients. On the 15 and 16th of April 2001, sixty people who tested positive were appropriately treated as per WHO protocol.

A brief history of the community is that in a small compound of not up to 200 people in the past seven years, five people had suffered from severe tuberculosis, and died, while the rest received various treatment from various places.

By this your aid, I believe that the spread by this disease is in check. Thank you very much for your concerned for the sick. Extend our gratitude to those who donated both medicine and cash to carry on the project.

Sincerely,

Rev Dr. C.A. Amadi.  
Assistant Secretary,  
Nigerian Baptist Convention
